                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                        |      |           |      |   |      |                             |       |        |        |                 |        |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |       |  |       |  |           |  |         |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                   |      |           |      |   |      |                             |       |        |        |                 |        |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  | |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | (サイン名)                      | —                 |      |                           |              |              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |      |           |      |   |      |                             |       |        |        |                 |        |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                        |      |           |      |   |      |                             |       |        |        |                 |        |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |       |  |       |  |           |  |         |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |
