                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |         |       |         |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |       |  |       |  |           |  |              |              |              |   |   |   |  |  |  |  |   |   |                   |  |  |  |  |   |     |   |  |  |  |  |        |  |     |  |  |  |  |        |  |   |  |  |  |  |   |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |       |    |  |  |  |  |      |    |  |  |  |  |   |     |    |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |     |   |  |  |  |  |   |     |   |  |  |  |  |      |   |  |  |  |  |   |      |   |  |  |  |  |       |   |  |  |  |  |   |        |   |  |  |  |  |       |   |  |  |  |  |   |   |   |  |  |  |  |       |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  |        |   |  |  |  |  |   |       |   |  |  |  |  |   |   |  |  |  |  |   |       |   |  |  |  |  | 工事の計画の(4)-27は、設置変更許可申請書（本文）の(4)-27と同義であり整合している。

「非常用ガス再循環系フィルタユニット」は、設置変更許可申請書（本文）における(4)-28を工事の計画における主たる登録として「原子炉格納施設」のうち「圧力低減設備その他の安全設備」に整理する。

工事の計画の(4)-29は、設置変更許可申請書（本文）の(4)-29と同義であり整合している。

設置変更許可申請書（本文）(4)-30で設計上の考慮は不要としている。
